Dub Dub $33,980 Operations Consumption Case

January 1, 2026 to July 31, 2026 | Drift resets and broad Operations outflows excluded from this case

Executive Summary

- The case is that Dub Dub sent $33,980.00 into Operations and $33,879.01 of that pool is consumed by labelled Operations activity.
- Stock orders account for $17,737.00, or 52.2% of the Dub Dub pool.
- The remaining non-stock labelled usage is $16,142.01, leaving only $100.99 numerically unresolved inside the $33,980.00 pool.
- The risk is not that the full amount is mathematically missing. The risk is that too much of the non-stock spend is weakly described, including named payouts, rounds, banking, rent, and balance entries.

Dub Dub pool	Stock orders	Other labelled use	Unresolved
$33,980.00	$17,737.00	$16,142.01	$100.99

How the $33,980 Was Consumed

Stock orders $17,737.00 | Other labelled use $16,142.01 | Unresolved $100.99

The Remainder After Stock Was Mostly Operational Spend

After stock orders, $16,243.00 remained. Labelled non-stock payments explain $16,142.01 of that amount, leaving $100.99 unresolved. This is why the case should focus on spend control and proof, not only missing cash.

Use	Rows	Amount	Share of $33,980
Other labelled payout	38	$7,638.00	22.5%
Rent / overhead	16	$5,015.00	14.8%
Tax / banking	5	$1,950.00	5.7%
Supplier / payables	1	$1,110.00	3.3%
Salaries / wages	2	$260.00	0.8%
Utilities	4	$124.00	0.4%
Transport	2	$35.00	0.1%
Groceries	1	$10.00	0.0%
Invest / perfumes	1	$0.01	0.0%

Evidence Rows Supporting the Case

These are the largest non-stock payment rows that consume the remainder. Rows like Round, Balance, named payouts, and Banking need receipts or clearer explanations even when the arithmetic balances.

Date	Shop	Use	Amount	Label
2026-05-04	kipasa	Rent / overhead	$1,200.00	May Rent
2026-04-13	kipasa	Supplier / payables	$1,110.00	payables
2026-03-23	operations	Other labelled payout	$1,000.00	Yohanne
2026-07-24	dubdub	Rent / overhead	$800.00	Bank | Direct POS Entry (dubdub)
2026-04-09	operations	Other labelled payout	$667.00	Romeo

Case Position and Required Follow-Up

- Case position: the business consumed $33,879.01 of the $33,980.00 Dub Dub Operations pool through recorded labelled activity.
- Stock orders are the biggest use at $17,737.00. That part should be checked against stock received, supplier receipts, and inventory movement.
- The non-stock remainder is not one clean business line. It is spread across rent/overhead, banking/tax, supplier payables, salaries, utilities, transport, groceries, and many small named or balance entries.
- The weak point is control evidence. The ledger descriptions are enough to show consumption, but not enough to prove every payout was reasonable or properly authorised.

Recommended Next Steps

- Attach receipts or proof for every stock order over $500.
- Force all Operations payouts to use a clear category instead of generic labels like Round, Balance, or a person name only.
- Review the named payouts and banking/rent rows with the owner and mark each as approved, rejected, or needs receipt.
- Treat the $100.99 unresolved balance as a small numeric open item, but treat weak documentation on the $16,142.01 non-stock spend as the main control issue.

Caveat

This report caps the case at the Dub Dub $33,980 pool and ignores broader Operations outflows above that amount. Operations cash is pooled, so this is a defensible use-of-funds allocation based on labelled activity, not a direct bank-style tracing of each dollar note.
